# YEASTY EARS

## ANTI-SEPTIC EAR RINSE (W/PS)

### PROPERTIES

FOR DOGS, CATS & HORSES

EDTA is a chelating agent that creates an unfavorable environment for bacteria; Tris(tromethamine) and the high pH (8) further enhance the activity of EDTA. Ketoconazole helps control yeast and fungi.

Preservatives in the solution also act as antiseptics. PS is a pro-ceramide to restore the skin barrier and help in the long term management of skin conditions. Phytosphingosine-HCl also has antiseptic properties. The alkaline pH may also be useful in other applications as determined by a veterinarian.

### DIRECTIONS FOR USE

Shake well before use. Apply V4B Yeasty Ears liberally to the affected area. Use cotton or absorbent material to remove excess solution and debris. Apply twice daily or as directed by a veterinarian. Do not allow the animal to lick the affected area until dry to prevent ingestion.

### PRESENTATION

Bottle of 4oz and 16oz

### INGREDIENTS

Ketoconazole 0.1%, EDTA, Tromethamine, Phytosphingosine-HCl 0.01%

### TECHNICAL SPECIFICATIONS

Solution for the antiseptic cleansing of skin and ears.

### STORAGE

Store at controlled room temperature.

### PRECAUTIONS

For topical use on animals only. Do not swallow. Avoid contact with the eyes or mucous membranes; if contact with the eyes occurs, rinse thoroughly with water and contact a veterinarian.
